

SUBSCRIBE TO **GROUP**

GROUP is a scholarly quarterly that publishes articles and reviews on group psychotherapy and group phenomena in general. Although the main focus is clinical and theoretical issues in group practice and supervision, **GROUP** also publishes research articles with clinical relevance. The journal pursues the goal of encouraging creative thought and dissemination of knowledge about group processes in a world where group methods are used widely, but with multiple theoretical orientations, contexts, purposes and ideologies. Writing in such fields as politics, sociology, history, economics, healthcare, education and the arts is also featured. Queries about articles in progress and suggestions for future issues are most welcome. Send them to the editor, Dominick Grundy: Grundy4@earthlink.net

Continuously published since 1976, **GROUP** is the journal of the Eastern Group Psychotherapy Society, an affiliate of the American Group Psychotherapy Association. Submitted material receives "blind" review by scholars and practitioners in the field who serve on the editorial board, although final decisions rest with the editor. Manuscripts are in English but may represent viewpoints from around the world. APA style is used.
